I declare, I confirm, I certify and I sign that I received substantial, important, line by line peer review with several and substantial comments, important remarks and hints from, at least, 3 Reviewers and the Assistant Editor for my paper:

Cumulant-based Robustness of ANOVA-Like Tests in Multiple Additive Models
with Authors: Cristina Dias, Carla Santos, and João Tiago Mexia

I would like to thank all the reviewers for their thoughtful comments and efforts towards improving our manuscript. We revised the manuscript with special attention to the comments that we received from Three (3) reviewers that were experts, specialists in the area of my paper.

I declare, confirm, certify and sign that WSEAS has checked my paper for possible plagiarism by Turnitin and my paper was found without plagiarism or self-plagiarism by Turnitin. I also declare, confirm, certify and sign that also that no Associate-Editor, no Editor-in-Chief, no member of the WSEAS Secretariat forced me in this Journal to add references (citations) to any previous publications of the journal.

I also declare, confirm, certify and sign that I have made all the changes, modifications, additions, studies, corrections asked by the reviewers and I have fully complied with their instructions. I also understand that before the publication the 3 (or more than 3) reviewers will check my paper to see if all the changes, modifications, additions, studies, corrections etc have been done and I authorize the WSEAS to publish my paper or to reject my paper even in the 2nd round of peer review or to continue with an additional round of peer review.

I also declare, I confirm, I certify and I sign that I will not publish this paper or an important part of the paper in any other Journal (inside or outside WSEAS) Conference Proceedings (inside or outside WSEAS), Book (inside or outside WSEAS), University Repository etc) without the written permission of the WSEAS.

I also declare, I confirm, I certify and I sign that this paper or an important part of the paper has not been published other Journal (inside or outside WSEAS) Conference Proceedings (inside or outside WSEAS), Book (inside or outside WSEAS), University Repository etc). In case of violation of the above terms, WSEAS can reject any unpublished paper or even retract any published paper.

Please, write additional comments below

We sincerely thank the Editor and the three Reviewers for their careful reading of the manuscript and for the constructive comments. The revision has led to improvement in the mathematical presentation, the definition of the scope and novelty of the work, the simulation design, and the presentation and interpretation of the numerical results. In particular, we have clarified the distinction between the multiple additive-model framework and classical/generalized additive modelling, strengthened the cumulant-based discussion of the ANOVA-like statistic, reframed the proposition as a heuristic robustness principle, provided a formal justification for the reduced simulation model, reconstructed the heteroscedastic simulation table, introduced an explicit and uniform classification criterion, and revised the discussion and conclusions so that they match the numerical evidence.
