Additional Comments:

The authors sincerely appreciate the valuable comments and constructive suggestions provided by the reviewers and editorial team. Their recommendations significantly improved the clarity, methodological transparency, and academic rigor of the manuscript. In response to the reviewers' remarks, the revised version includes additional explanation regarding participant selection criteria, questionnaire development, IOC validation procedures, reliability analysis, and the exploratory factor analysis methodology. Comparative discussion relating to aging societies such as Japan, South Korea, and Singapore was also incorporated to strengthen the international relevance of the study. Furthermore, the discussion and limitations sections were revised to present a more balanced interpretation of the findings and to acknowledge implementation challenges related to digital literacy, socioeconomic inequality, and regional infrastructure differences. The authors believe that these revisions have substantially strengthened the quality and contribution of the manuscript.
